OUR SERVICES

For a variety of difficult industrial, stationary, and trackless mining equipment applications, we offer Eaton Aeroquip hydraulic hoses and fittings. Eaton spiral 4- and 6-wire hoses are the ideal choice for ultimate durability and long-lasting performance in even the most demanding circumstances.

Services

SERVICE AND MAINTENANCE:

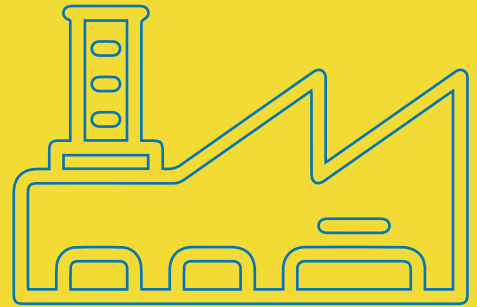

To provide our clients with a range of specialist services, we use highly qualified technicians. Our services are not restricted to a single Original Equipment Manufacturer (OEM), but rather span a wide range, offering our clients flexibility in their overall fleet maintenance management plans and the chance to enter into a comprehensive Maintenance and Repair Agreement. We offer maintenance and repair contracts in:

- **Full reliability centered on site maintenance and repairs agreements.**
- **Field Service Technicians agreements.**
- **Onsite component change out crews agreements.**
- **Onsite equipment mini-rebuilds agreements**
- **Onsite maintenance and repair special skills agreements**
- **Reclamation Crews for decommissioned components and equipment agreements**

OUR SERVICES

EQUIPMENT REBUILDS:

We repair diverse machine components, including hydraulic cylinders, gearboxes, differentials, transmissions, axles, brakes, and convertors, as well as rebuild a variety of equipment to Original Equipment Manufacturer (OEM) requirements. As appropriate, we also provide insightful guidance on product enhancement for maximizing productivity

EQUIPMENT RECLAMATION

According to a customer's request, we recover carcasses from decommissioned underground trackless mining equipment for recycling. As necessary, our knowledgeable workers disassemble the machinery into sizable pieces for secure transport from subterranean mines and logistical management.

ONSITE LINE BORING:

Deenaledi Mining and Engineering Services uses market leading equipment for its proven reliability and its unsurpassed accuracy in restoring critical dimensions to Original Equipment Manufacturer specifications.

Our work covers all critical areas such as buckets, dog bones, swing levers, H-Frames, booms, center articulation, steering anchors and front frames etc.
